History of R Studio

**Evolution of R:**

R is a programming language and software environment for statistical analysis, graphics representation and reporting. R was initially written by Ross Ihaka and Robert Gentleman at the Department of Statistics of the University of Auckland in Auckland, New Zealand. R made its first appearance in 1993. A large group of individuals has contributed to R by sending code and bug reports. Since mid-1997 there has been a core group (the "R Core Team") who can modify the R source code archive.

**Built-in function**

The functions which are already created or defined in the programming framework are known as built-in functions. User doesn't need to create these types of functions, and these functions are built into an application. End-users can access these functions by simply calling it. R have different types of built-in functions.

Function	Description
<code>abs(x)</code>	absolute value
<code>sqrt(x)</code>	square root
<code>ceiling(x)</code>	ceiling(3.475) is 4
<code>floor(x)</code>	floor(3.475) is 3
<code>trunc(x)</code>	trunc(5.99) is 5
<code>round(x, digits = n)</code>	round(3.475, digits=2) is 3.48
<code>signif(x, digits = n)</code>	signif(3.475, digits=2) is 3.5
<code>log(x)</code>	natural logarithm
<code>log10(x)</code>	common logarithm
<code>exp(x)</code>	exponential value (i.e) $e^x$
<code>sin(x)</code> , <code>cos(x)</code> , <code>tan(x)</code>	returns sine, cosine and tan values of x
